

police

Location: facilities\police

Description

Polygons containing police stations in Bay County, including substations, sheriff offices, state patrol station, and military police station. Also available as points in **police_pt.shp**.

Source

Bay County GIS created this polygon shapefile in October 1999. County parcel polygons were selected, copied, and split where necessary (on Tyndall) in Arcview, using these references: parcel use description (field pusedesc), parcel owner name (fields mname, maddress), parcel address (field paddress), 1999 telephone book, 1998 MAPSource Street Atlas, digital aerials, and **bay2.dbf**. **Bay2.dbf** is a list of critical facilities, part of a shapefile that is part of the Bay County Hazard Mitigation Strategy prepared by FSU Urban and Regional Planning Studio 1997 (fsulhms\bay county lhms\phase 1\gis projects\data\bay2.shp).

In January 2000, Bay County GIS created a coverage from this shapefile, for use as label points.

In August 2001, Bay County GIS created a point shapefile **police_pt.shp**.
